NEW TECHNIQUES AND IDEAS IN QUANTUM MEASUREMENT THEORY[a]

Editor and Conference Chairman
DANIEL M. GREENBERGER

Conference Organizing Committee
OLIVER COSTA DE BEAUREGARD, LLOYD MOTZ, ABNER SHIMONY, and ANTON ZEILINGER

CONTENTS

Preface. *By* DANIEL M. GREENBERGER xiii

E. P. Wigner: An Introduction. *By* A. S. WIGHTMAN xv

Response. *By* E. P. WIGNER xix

Part I. Space-Time Considerations

The Nonrelativistic Nature of the Present Quantum Mechanical Measurement Theory. *By* E. P. WIGNER 1

Quantum Theory and the Appearance of a Classical World. *By* E. JOOS 6

Relativity and Quantum Mechanics—Conflict or Peaceful Coexistence? *By* MICHAEL L. G. REDHEAD 14

Part II. Macroscopic Effects in Quantum Theory

Quantum Mechanics and Realism at the Macroscopic Level: Is an Experimental Discrimination Feasible? *By* A. J. LEGGETT 21

Quantum Mechanics on a Macroscopic Scale. *By* SUDIP CHAKRAVARTY 25

Schrödinger's Cat: A Realization in Superconducting Devices. *By* C. D. TESCHE 36

Macroscopic Quantum Tunneling at Finite Temperatures. *By* PETER HANGGI ... 51

Effects of Dissipation and Temperature on Macroscopic Quantum Tunneling in Josephson Junctions. *By* SEAN WASHBURN and RICHARD A. WEBB 66

Quantum Mechanics of Macroscopic Systems and the Measurement Process. *By* MIKIO NAMIKI 78

Reduction of the Wave Packet and Environment-Induced Superselection. *By* W. H. ZUREK 89

[a]The papers in this volume were presented at a conference entitled New Techniques and Ideas in Quantum Measurement Theory, which was held by the New York Academy of Sciences on January 21–24, 1986, in New York City. The conference was respectfully dedicated to Eugene P. Wigner. In addition, the conference was listed as a topical conference by the American Physical Society.

Part III. Photon Experiments

A New Light on Single Photon Interferences. *By* P. GRANGIER, G. ROGER, and A. ASPECT 98

Realizations of "Delayed-Choice" Experiments. *By* T. HELLMUTH, ARTHUR G. ZAJONC, and H. WALTHER 108

EPRB and the Wigner Distribution for Spin-½ Particles. *By* MARLAN O. SCULLY and LEON COHEN 115

Frontier of Femtosecond and Picosecond Optical Measuring Techniques. *By* R. R. ALFANO 118

An Experimental Test of Locality Using a Single-Photon Interferometer. *By* J. D. FRANSON 127

Part IV. Neutron and Electron Interferometry

Polarized Neutron Interferometry. *By* G. BADUREK, H. RAUCH, and D. TUPPINGER 133

Neutron Interferometry at Missouri: Recent Developments. *By* SAMUEL A. WERNER 147

Three Gedanken Experiments on Complementarity in Double-Slit Diffraction. *By* ANTON ZEILINGER 164

Electron Interferometry Applied to Objects of Atomic Dimensions. *By* HANNES LICHTE 175

Part V. Magnetic Flux Effects

The Nonlocal Character of the Conductance in the Weakly Localized Limit. *By* G. J. DOLAN and D. J. BISHOP 190

Flux-Sensitive Effects in Normal Metal Loops. *By* MARKUS BÜTTIKER 194

Magnetic Monopoles and Dipoles in Quantum Mechanics. *By* HARRY J. LIPKIN and MURRAY PESHKIN 210

A Possible Test of the Topological Effect in Quantum Mechanics. *By* AKIRA INOMATA 217

Part VI. Connection to Gravity

General Relativistic Effects on Superconductors. *By* JEEVA ANANDAN 224

Quantum Measurement. *By* W. G. UNRUH 242

Progress in Back Action Evasion Experiments. *By* MARK F. BOCKO and WARREN W. JOHNSON 250

Part VII. Quantum Ensembles

EPR Correlations and EPW Distributions. *By* J. S. BELL 263

Decay of Quantum Coherence due to the Presence of a Heat Bath: Markovian Master-Equation Approach. *By* R. F. O'CONNELL, C. M. SAVAGE, and D. F. WALLS 267

The Discrete Wigner Function. *By* WILLIAM K. WOOTTERS 275

Joint Quantum Probabilities and the Uncertainty Principle. *By* LEON COHEN ... 283

On Measurable Distinctions between Quantum Ensembles. *By* M. P. SILVERMAN 292

Part VIII. Other Theoretical Considerations

How Come the Quantum? *By* JOHN ARCHIBALD WHEELER 304

Causality as Identified with Conditional Probability and the Quantal Nonseparability. *By* O. COSTA DE BEAUREGARD 317

Gauge-Fields and Integrated Quantum-Classical Theory. *By* HENRY P. STAPP.. 326

Amplifiers, Attenuators, and Schrödinger's Cat. *By* ROY J. GLAUBER 336

Reality and Quantum Mechanics. *By* FRITZ ROHRLICH 373

Probability in Quantum Mechanics. *By* L. E. BALLENTINE 382

Towards a Theory of Single Events in Spin Correlation Experiments. *By* A. O. BARUT 393

Towards a Stochastic Classical Theory of the Particle Behavior of Light. *By* TREVOR MARSHALL and EMILIO SANTOS 400

Part IX. Measurement Theory

Quantum Theory of Measurement. *By* WILLIS E. LAMB, JR 407

Novel Properties of Preselected and Postselected Ensembles. *By* Y. AHARONOV, D. ALBERT, A. CASHER, and L. VAIDMAN 417

The EPR Experiment—Thoughts about the "Loophole". *By* N. DAVID MERMIN 422

Does Bell's Theorem Apply to Theories That Admit Time-Dependent States? *By* JON P. JARRETT 428

When Is a Quantum Measurement? *By* ASHER PERES 438

The Haunted Measurement in Quantum Theory. *By* DANIEL M. GREENBERGER and ALLAINE YA'SIN 449

A Discussion of the EPR Contained in Quantum Mechanical Terms without Arguments of Realities or Bell's Relations. *By* ORESTE PICCIONI and WERNER MEHLHOP 458

Einstein-Podolsky-Rosen Interferometry. *By* MICHAEL A. HORNE and ANTON ZEILINGER 469

Part X. Quantum Computation

Quantum Mechanical Hamilitonian Models of Computers. *By* PAUL BENIOFF... 475

Quantum Computation. *By* NORMAN MARGOLUS 487

Part XI. Alternative Approaches to Quantum Theory

How to Take a Photograph of Another Everett World. *By* DAVID ALBERT..... 498

Trajectories, Spin, and Energy Conservation in Time-Dependent Neutron Interferometry. *By* JEAN-PIERRE VIGIER 503

Making Consistent Inferences from Quantum Measurements. *By* ROBERT B. GRIFFITHS 512

Variable Photon Detection as an Explanation of EPR Experiments. *By* F. SELLERI 518

The Locality Problem in Stochastic Mechanics. *By* EDWARD NELSON 533

Suppose the State Vector Is Real: The Description and Consequences of Dynamical Reduction. *By* PHILIP PEARLE 539

A Research Program with No "Measurement Problem". *By* H. PIERRE NOYES, CHRISTOFFER GEFWERT, and MICHAEL J. MANTHEY 553

Part XII. Poster Papers

A Derivation of Quantum Phenomena from a Wave System Model. *By* T. B. ANDREWS 564

A Proposal for the Completion of the Realization of Wigner's Gedanken-Experiment. *By* M. BOŽIĆ 565

Two-Time States of a Spin-Half Particle in a Uniform Magnetic Field. *By* SUSAN S. D'AMATO 568

Continuously Variable Spin Vectors and Spin Measurements in the Causal Interpretation of Quantum Mechanics. *By* C. DEWDNEY 571

On a Lorentz Invariant Quantum Theory of Measurement. *By* G. N. FLEMING . 574

Lagrangian with Nonlinear Terms for the Self-Energy and Particle-Particle Interactions. *By* PAUL HARRIS 576

Can Single Quantum Events Carry Superluminal Signals? *By* NICK HERBERT .. 578

Locality, Causality, and the Aharonov-Bohm Effect. *By* P. R. HOLLAND 579

Information Mechanics Perspective on Some Assumptions in Classical Mechanics and Quantum Mechanics about Measurement. *By* F. W. KANTOR 581

Einstein-Podolsky-Rosen Constraints on Quantum Action-at-a-Distance: The Sutherland Paradox. *By* A. KYPRIANIDIS 585

Minimal Uncertainty and Maximal Information for Quantum Position and Momentum. *By* PEKKA J. LAHTI 588

Causal Description of Measurement in Quantum Mechanics. *By* ULF LARSEN .. 590

Relativistic Quantum Measurement and the Quantum Electrodynamic Arrow of Time. *By* DARRYL LEITER 594

A Geometric Introduction to Quantum Mysteries. *By* VICTOR MANSFIELD and DAVID HENDERSON 597

The Problem of Internal Properties in Quantum Mechanics. *By* ANDRE MIRABELLI 599

Quantum Mechanics Determines the Dimension of Space. *By* R. MIRMAN 601

The Coherence Properties of Particle Beams. *By* K. RUBIN and I. EFREMOV 604

Proposed Experimental Investigation of Uncertainty Relations by Measuring the Velocity Dispersion of Localized Neutrons. *By* J. SCHEER and M. SCHMIDT 607

A Comment on Bell's Inequality; Mental Activity and Physical Reality. *By* DOUGLAS M. SNYDER 611

The Quantum Condition and the Non-Euclidean Nature of Space-Time. *By* E. J. STERNGLASS 614

Derivation of the Schrödinger Equation from Hamilton-Jacobi Theory in a Complexified Space with Extra Dimensions. *By* CHRISTIAN J. TOURENNE .. 618

The Predictability of the Results of Measurements of Noncommuting Variables. *By* LEV VAIDMAN and YAKIR AHARONOV 620

Simultaneous Particle and Wave Knowledge in Quantum Theory. *By* ALLAINE YA'SIN and DANIEL M. GREENBERGER 622

Quantum Mechanics and General Relativity. *By* HÜSEYIN YILMAZ 625

Does Distribution Fail in the Logic of Quantum Theory? *By* SILVIO ZENONE 627

Part XIII. Summary of Conference

Concluding Remarks. *By* ABNER SHIMONY 629
